DETAILS

Santos selected TAMS Group Integrated Subsea Services Team to deliver the 2023 Varanus Island Marine Terminal (VIMT) Diving Inspections at Santos Varanus Island Hub.

The project team and marine spread mobilised at TAMS Onslow Shorebase, transiting the 65NM to Varanus Island to perform worksopes including:

- VI Tanker Loading Line Submarine Hose CVI Inspection
- Submersible Hose Leak Test
- Seabed Abrasive Object Survey
- VI Marine Terminal Mooring Inspections
- Superline Mooring Line Replacement P2 & S2
- VI Small Boat Mooring Inspections
- Reporting for all activities / inspections above

At the completion of works the marine spread returned to TAMS Onslow Shorebase for demobilisation of vessels and personnel.

The project deliverables included reporting inputs for Santos Asset Integrity Database and PPA Klein Mooring Inspection Compliance Reports.
